

# 2025 Chips JU Call for proposals for Design Enablement Teams

**Information Workshop**

**11 April 2025, Brussels**

EUROPEAN  
PARTNERSHIP

# OBJECTIVES

In 2025, the Chips Joint Undertaking has decided to launch a **Call for Design Enablement Teams (DET)** to support the **Design Platform (DP)** of the **Chips for Europe Initiative** (*Pillar 1* of the *EU Chips Act*).

- The aim of this **workshop** is to **inform** the **community** on the provisions of the upcoming call for DET.
- This workshop fits in a **series of preceding consultation and information workshops** on the Design Platform and **reflects community's feedback** received from those workshops.

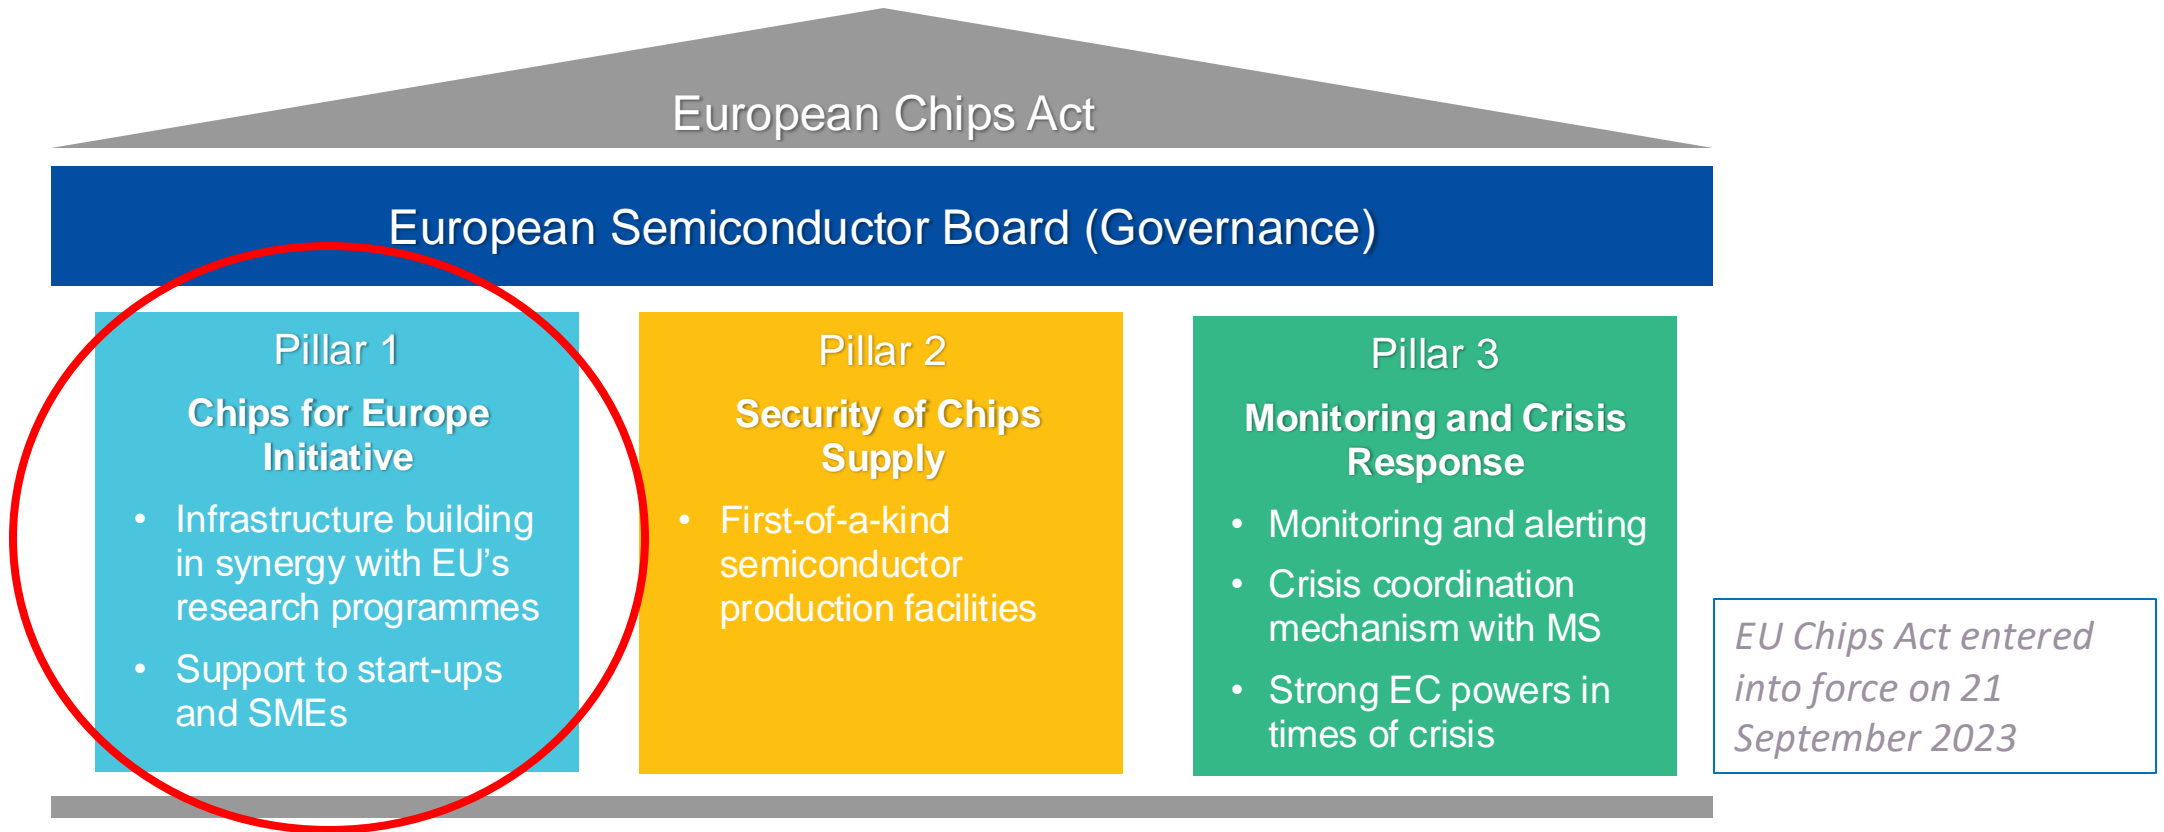

# AGENDA

- |                        |  |
|------------------------|--|
| 10:00-10:10 (10 min)   | <b>Welcome</b> note and <b>Introduction</b> (Georgi Kuzmanov, Chips JU)                        |
| 10:10-10:30 (20 min)   | The <b>Design Platform</b> and the <b>Platform Coordination Team</b><br>(Romano Hoofman, imec) |
| 10:30-10:50 (20 min)   | Focus on <b>Design Enabling Teams</b><br>(David Servat, CEA)                                   |
| 10:50-11:00(10 min)    | DET call specifics: Budget, Calendar, Eligibility, Evaluation<br>(Georgi Kuzmanov, Chips JU)   |
| 11:00 – 11:30 (15 min) | <b>Q&amp;A</b> and conclusive discussions  |

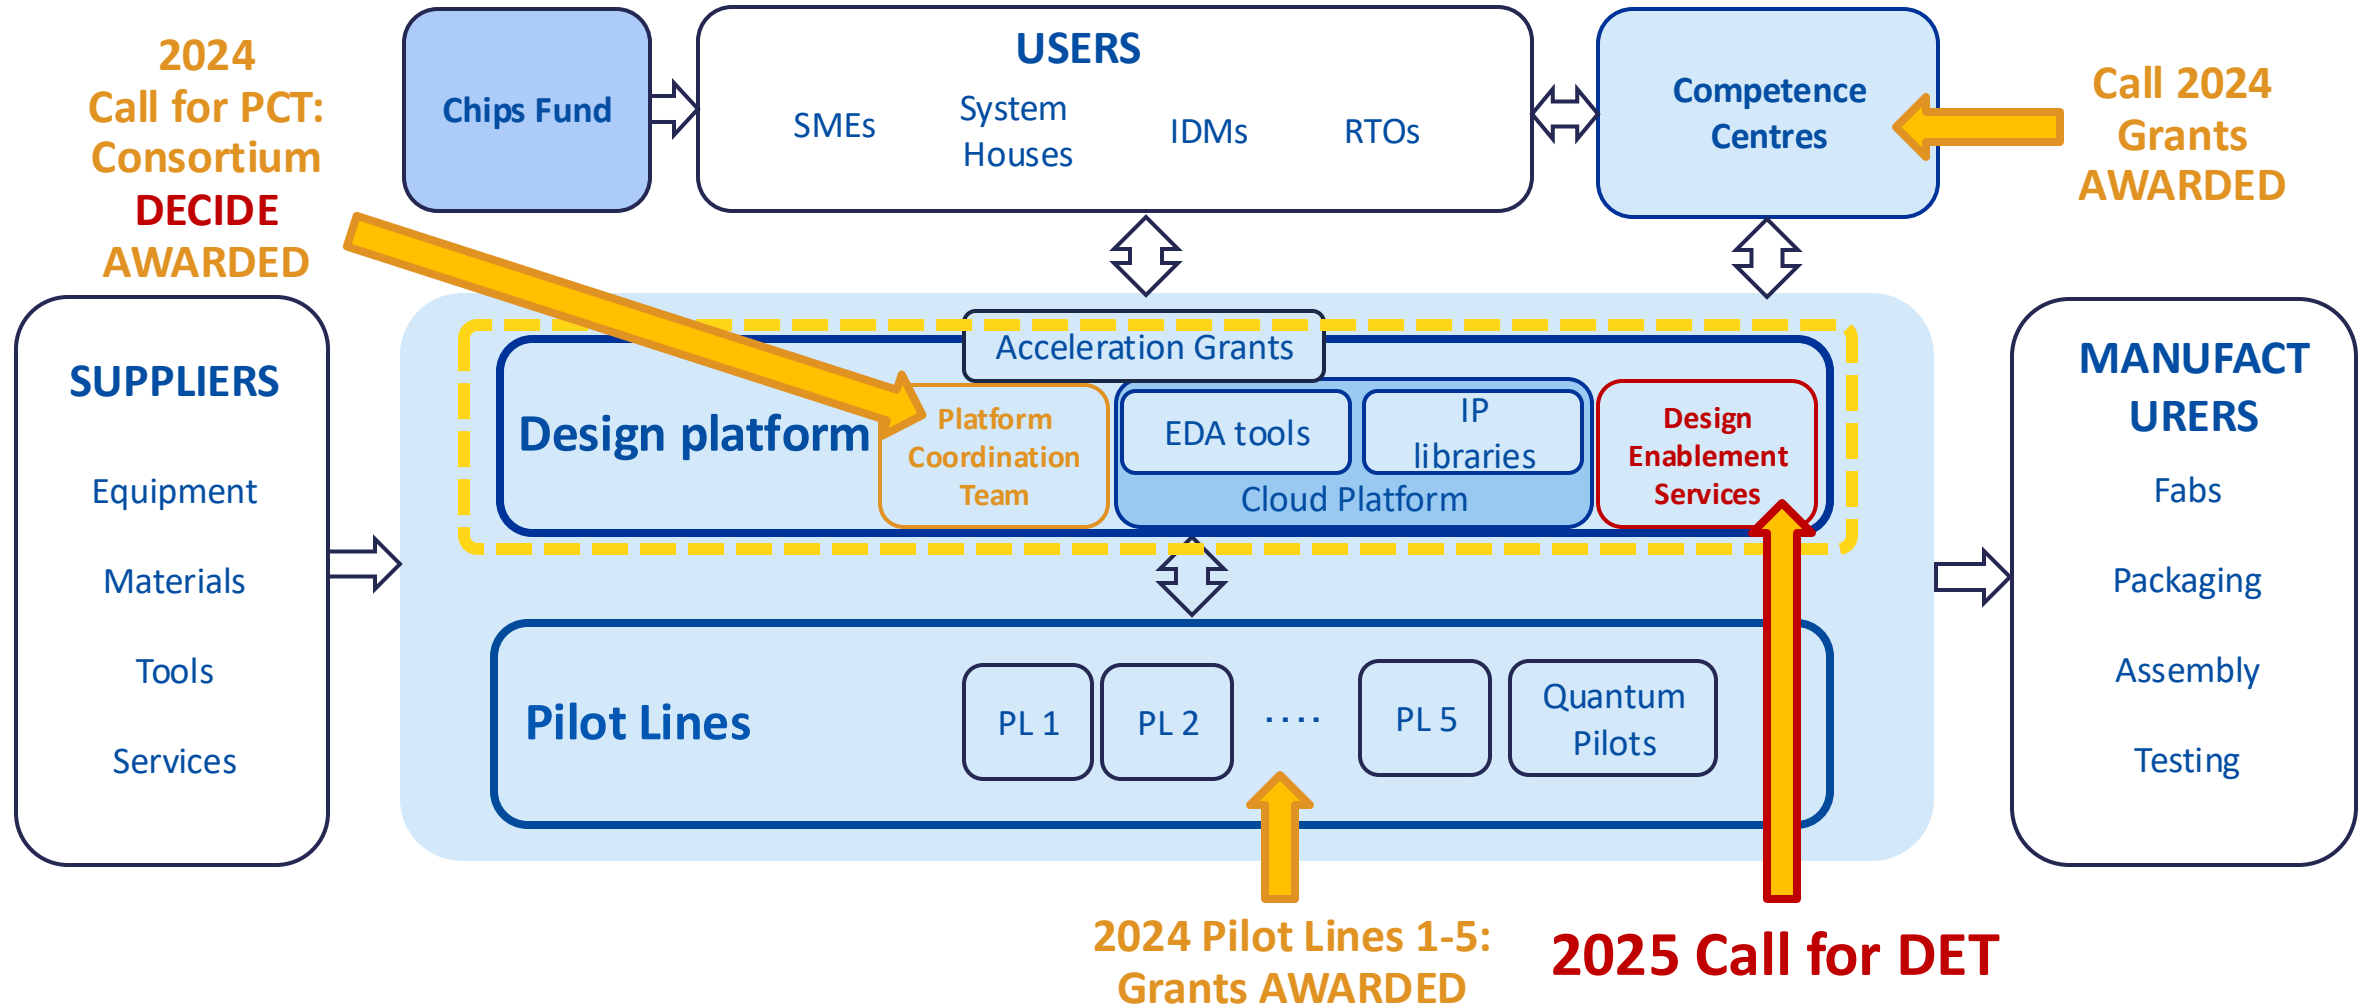

# WHAT IS CHIPS JOINT UNDERTAKING?

- Public-private partnership (PPP)
  - Partnerships between public authorities and industry intend to bring project results closer to the market and improve the link between research and societal growth. The PPPs are based on long term contracts that can take many different legal forms, from contractual partnerships to specific legal entities.
- Joint undertaking (JU)
  - A Joint Undertaking is an institutionalized PPP with its own legal identity, with its own governance, budget etc.. The JUs are established by an EU regulation.
- Chips JU
  - Chips JU was established in September, 2023, in an amendment to the Single Basic Act to implement the first pillar of the Chips Act and to continue the activities of its predecessors in the field of electronic components and systems (ECS). The Chips JU is a tri-partite partnership between the EC, the participating states and European industries; most of our actions are funded jointly and equally by these actors.
